

It's Alive

Yankee Stadium seats 57,600 spectators.

At the last baseball game, David and Asa's independent research found gum stuck to the bottom of 2 out of 3 seats, in a variety of flavors and colors.

If their research is correct, exactly how many seats in Yankee Stadium actually have gum stuck to them and what flavors are they?

Gum on the seats

Prolonged exposure to 85 decibels can lead to deafness.

If your school bell rings at 118 decibels, and someone lucky enough to get caught under it when it rings jumps $4\frac{1}{2}$ centimeters per decibel, how high do they jump?

School bell
