

MAKE 7™

**For 2 players
Ages 7 to adult**

Instructions

Object:

Be the first player to have your color number tiles add up to 7—in a straight line—either vertically, horizontally or diagonally!

Contents:

Deluxe plastic game console, console base, white and yellow number tiles, label sheet.

Set Up:

Remove the red square labels from the label sheet and, using the package as a guide, place them on the special, raised squares on the console. Decorate both sides in the same way!

Remove the Make 7 label from the sheet and carefully place it on the top part of the game console as shown on the package. Do the same with the other label on the other side of the console.

Place the console into the console base by sliding the two large tabs into the tab openings. Make sure that the release knob is positioned so that the tiles will stack on the bottom ledge and not fall through to the base.

One player takes all the white tiles; the other takes all the yellow tiles. To determine which player goes first, one player puts one yellow tile in one hand and one white tile in the other. Whichever color the other player chooses will be the player who goes first.

Playing:

On your turn place one of your color number tiles in any of the seven slots at the top of the console. The only rule in placing your tiles is that a 3 can only be placed so that it lands in a special red square. 1s and 2s can go anywhere—including the red squares!

The second player then places one of his tiles in a slot and so on.

Winning:

The first player to make 7 by connecting his tiles in a straight line—either vertically, horizontally or diagonally—wins the game.

The Make 7 game console features an easy release knob. When you're done with your first game, carefully turn the knob on the side of the console and the tiles will fall. Reposition the knob and get ready for your next game!
