

**THE STORY**

Tina, Thad, Terry and Teddie were four African birds who earned their livings by eating ticks off the backs of seven different kinds of African animals. This provided a valuable service while filling their bellies at the same time. Each bird visited each different type of animal, but no bird made the same number of visits to any particular type of animal as any other bird. Based on the clues, match the birds with the number of animals each bird visited in one day.

**THE CLUES**

1. Tina, Thad and Terry each visited the most of two types of animals, and each also visited the fewest of two types of animals.
2. Teddie visited more rhinos than Tina, Tina visited more rhinos than Thad, and Thad visited more rhinos than Terry.
3. Terry's warthog number was one-half the size of Teddie's rhino number.
4. Terry and Teddie visited a combined total of 190 elephants. Thad visited 2 more hippos than Tina but 2 less than Terry.
5. Tina visited more gnus than Thad and more zebras than Thad, but Thad visited more elephants than Tina.
6. Terry visited more buffalo than Teddie and more zebras than Teddie, but Teddie visited more gnus than Terry.
7. Tina's warthog number was 75% of Thad's warthog number.
8. Teddie visited fewer hippos than Tina.

Tina	Thad	Terry	Teddie
50 rhinos	50 rhinos	50 rhinos	50 rhinos
45 rhinos	45 rhinos	45 rhinos	45 rhinos
40 rhinos	40 rhinos	40 rhinos	40 rhinos
